Professional Summary

Computer Science and Engineering undergraduate focused on Data Analytics and Python-based data analysis. Completed NPTEL's Data Analytics with Python course and selected for the NPTEL Winter Internship. Experienced in working with real-world datasets using Python, Pandas, NumPy, Matplotlib, and Seaborn, with hands-on experience in data cleaning, exploratory analysis, statistical analysis, and data visualization. Interested in using data to identify patterns, communicate findings, and support data-driven decisions.

Education

GRT Institute of Engineering and Technology <i>B.E. Computer Science and Engineering</i> NxtWave – CCBP 4.0 <i>Full Stack Development Program</i>	2024 – Present <i>Tiruttani, India</i> 2024 – Present <i>4-Year Learning Program</i>
--	---

Technical Skills

Programming	Python, Java, C
Data Analytics	Data Cleaning, Exploratory Data Analysis, Statistical Analysis, Data Interpretation, Data Visualization
Python Libraries	Pandas, NumPy, Matplotlib, Seaborn
Database & Tools	SQL, Supabase, Jupyter Notebook, Git, GitHub, VS Code
Core Skills	Analytical Thinking, Problem Solving, Logical Thinking

Data Analytics Projects

Student Performance Analysis 🌐 GitHub Repository - Analyzed 1,044 student records across 34 features covering academic, demographic, social, and behavioral factors. - Performed data-quality checks with 0 missing values and 0 duplicate records, followed by feature engineering and exploratory analysis. - Found an overall 77.87% pass rate and identified a 3.22-point performance gap between higher-education aspirants and non-aspirants. - Compared Mathematics and Portuguese performance and identified a 17.81 percentage-point pass-rate difference; created 8 analytical visualizations for performance and correlation analysis.	<i>Python / Pandas / NumPy / Matplotlib / Seaborn</i>
E-Commerce Sales & Customer Analysis 🌐 GitHub Repository - Analyzed e-commerce transaction data to evaluate revenue, product performance, customer behavior, category trends, and monthly sales. - Applied Pandas-based data cleaning, transformation, aggregation, and exploratory analysis to prepare transactional data for business analysis. - Calculated key performance indicators including revenue, order-level metrics, category performance, customer contribution, and time-based sales trends. - Developed analytical visualizations and documented the complete workflow in a reproducible Python/Jupyter project with a structured report.	<i>Python / Pandas / NumPy / Matplotlib / Seaborn</i>

Experience

AppDost – Complete IT Solutions <i>Web Development Intern</i>	Present <i>India</i>
Contributing to software development tasks and feature enhancements in a real-world internship environment.	

Certifications

- NPTEL** – Data Analytics with Python
- NPTEL** – Data Structures and Algorithms using Java
- AWS Academy** – Generative AI
- Red Hat Academy** – Python Programming

Achievements

- Selected for the **NPTEL Winter Internship**.
- Winner of a college-level hackathon and awarded an internship opportunity.
